1. Which of the following personal protective devices would you use for cardiopulmonary resuscitation? Splattering is unlikely.
   a. Gloves
   b. Gown
   c. Mask
   d. Eyewear

2. Which of the following personal protective devices would you use for central venous line insertion and venesection?
   a. Gloves
   b. Gown
   c. Mask
   d. Eyewear

3. Which of the following personal protective devices would you use for a chest drainage system change? Splattering is likely.
   a. Gloves
   b. Gown
   c. Mask
   d. Eyewear

4. Which of the following personal protective devices would you use for chest tube insertion or removal?
   a. Gloves
   b. Gown
   c. Mask
   d. Eyewear
5. Which of the following personal protective devices would you use for cleaning stools, spilled blood or body substances, or surface contaminated by blood or body fluids?
   a. Gloves
   b. Gown
   c. Mask
   d. Eyewear

6. Which of the following personal protective devices would you use for flexible sigmoidoscope colonoscopy?
   a. Gloves
   b. Gown
   c. Mask
   d. Eyewear

7. Which of the following personal protective devices would you use for forceful and frequent coughing by patient and direct contact with secretions?
   a. Gloves
   b. Gown
   c. Mask
   d. Eyewear

8. Which of the following personal protective devices would you use for enema? Soiling is likely.
   a. Gloves
   b. Gown
   c. Mask
   d. Eyewear

9. Which of the following personal protective devices would you use for dressing change for burns?
   a. Gloves
   b. Gown
   c. Mask
   d. Eyewear
10. Which of the following personal protective devices would you use for dressing removal or change for wounds with little or no drainage?

   a. Gloves  
   b. Gown  
   c. Mask  
   d. Eyewear

11. Which of the following personal protective devices would you use for intubation or extubation? Splattering is likely.

   a. Gloves  
   b. Gown  
   c. Mask  
   d. Eyewear

12. Which of the following personal protective devices would you use for pelvic examination and Papanicolaou (PAP) test?

   a. Gloves  
   b. Gown  
   c. Mask  
   d. Eyewear

13. Which of the following personal protective devices would you use for postmortem care?

   a. Gloves  
   b. Gown  
   c. Mask  
   d. Eyewear

14. Which of the following personal protective devices would you use for pressure ulcer care?

   a. Gloves  
   b. Gown  
   c. Mask  
   d. Eyewear
15. Which of the following personal protective devices would you use for nasotracheal or endotracheal suctioning? Splattering is unlikely.
   a. Gloves
   b. Gown
   c. Mask
   d. Eyewear

16. Which of the following personal protective devices would you use for oral or nasal suctioning?
   a. Gloves
   b. Gown
   c. Mask
   d. Eyewear

17. Which of the following personal protective devices would you use for tracheostomy tube change?
   a. Gloves
   b. Gown
   c. Mask
   d. Eyewear

18. Which of the following personal protective devices would you use for wound packing?
   a. Gloves
   b. Gown
   c. Mask
   d. Eyewear

19. Which of the following personal protective devices would you use when dealing with an acute care patient that has a urinary tract infection?
   a. Gloves
   b. Gown
   c. Mask
   d. Eyewear
   e. N95 respirator
20. Which of the following personal protective devices would you use when dealing with an acute care patient that has avian influenza?

   a. Gloves  
   b. Gown  
   c. Mask  
   d. Eyewear  
   e. N95 respirator

21. Which of the following personal protective devices would you use when dealing with an acute care patient that has chickenpox (varicella zoster virus)?

   a. Gloves  
   b. Gown  
   c. Mask  
   d. Eyewear  
   e. N95 respirator

22. Which of the following personal protective devices would you use when dealing with an acute care patient that has croup?

   a. Gloves  
   b. Gown  
   c. Mask  
   d. Eyewear  
   e. N95 respirator

23. Which of the following personal protective devices would you use when dealing with an acute care patient that has diphtheria?

   a. Gloves  
   b. Gown  
   c. Mask  
   d. Eyewear  
   e. N95 respirator

24. Which of the following personal protective devices would you use when dealing with an acute care patient that has an enteroviral infection (Echovirus, Cosackie A & B)?

   a. Gloves  
   b. Gown  
   c. Mask  
   d. Eyewear  
   e. N95 respirator
25. Which of the following personal protective devices would you use when dealing with an acute care vomiting patient that has gastroenteritis?
   
a. Gloves  
b. Gown  
c. Mask  
d. Eyewear  
e. N95 respirator

26. Which of the following personal protective devices would you use when dealing with an acute care patient that has Herpes simplex (mucocutaneous)?
   
a. Gloves  
b. Gown  
c. Mask  
d. Eyewear  
e. N95 respirator

27. Which of the following personal protective devices would you use when dealing with an acute care patient that has Lassa fever (Lassa virus)?
   
a. Gloves  
b. Gown  
c. Mask  
d. Eyewear  
e. N95 respirator

28. Which of the following personal protective devices would you use when dealing with an acute care patient that has a Marburg virus?
   
a. Gloves  
b. Gown  
c. Mask  
d. Eyewear  
e. N95 respirator

29. Which of the following personal protective devices would you use when dealing with an acute care patient that has Monkeypox?
   
a. Gloves  
b. Gown  
c. Mask  
d. Eyewear  
e. N95 respirator
30. Which of the following personal protective devices would you use when dealing with an acute care patient that has pulmonary tuberculosis?

   a. Gloves  
   b. Gown  
   c. Mask  
   d. Eyewear  
   e. N95 respirator

31. Which of the following personal protective devices would you use when dealing with an acute care patient that has Norovirus?

   a. Gloves  
   b. Gown  
   c. Mask  
   d. Eyewear  
   e. N95 respirator

32. Which of the following personal protective devices would you use when dealing with an acute care patient that has poliomyelitis?

   a. Gloves  
   b. Gown  
   c. Mask  
   d. Eyewear  
   e. N95 respirator

33. Which of the following personal protective devices would you use when dealing with an acute care patient that has scarlet fever (*Streptococcus pyogenes*)?
